Join us in pilgrimage to Chartres, France July 2 -8 where we will contemplate the cosmos as a divine work of beauty, and how the sounds of the cosmos can heal, inspire and transform us. Join us in Chartres to explore the healing power of what the philosopher Pythagoras called the "music of the spheres" on our psyches and destinies as we collectively heal through music and sound therapies, reflective time in the cathedral, shared dreams, walking the labyrinth, and dancing the patterns & rhythms of our cosmos.

Our bodies can be tuned like musical instruments. All existence is vibratory in nature. When you are aware of your own inner vibrations, able to witness life around you as a concert of sound, to discover that you are in fact sound, then the division between our internal and external perceptions of reality blend into harmony. Sound is the perfect tool for healing practices, as well as personal development, because it resonates with the nature of existence and affects individuals on all levels. Your "Ultrasonic Core" has the potential to transform the act of listening into a harmonious experience with profound biological and psychological benefits.
